

# PDF with Active Content - JavaScript Embedded

This PDF contains embedded JavaScript for testing active content detection.

When scanned with Active Content Detection enabled, this will be flagged.

## Embedded JavaScript Actions:

### 1. Document Open Action:

```
app.alert('Document opened with active content');
```

### 2. Named JavaScript:

```
app.alert('This PDF contains active JavaScript content...');
```

Security Note: JavaScript in PDFs can be used for malicious purposes including phishing, data exfiltration, and unauthorized actions.
